A Manual of Italian Literature

Suppressed Inventions and Other Discoveries

Revealing the World's Greatest Secrets of Science and Medicine *Penguin*

A scientist with a revolutionary cure for AIDS is incarcerated without explanation. Valuable artifacts are mysteriously misplaced by a prominent archaeological institution. Three celebrated astronauts perish in a suspicious fire after voicing their criticism of the US space program. Yet our world's most powerful agencies

hastily dispel these alarming reports as conspiracy theories, and bury them in padlocked archives. The fact is that a suppression syndrome exists in our society. *Suppressed Inventions and Other Discoveries* exposes the startling degree of truth behind the rumors. Jonathan Eisen has collected over forty intriguing stories of scientific cover-ups and programs of misinformation concocted to conceal some of the most phenomenal innovations in mankind's history. These no-holds-barred accounts force us to confront the naiveté—and danger—of trusting our academic and political leaders to act always for the common good. *Suppressed Inventions and Other Discoveries* presents documented evidence that corporate self-interest, scientific arrogance, and

political savvy have contrived to keep us in the dark about technological breakthroughs or interplanetary contact that may shift the current balance of power. Prepare yourself for a revealing look at the research and development to which we've been denied access. *Suppressed Inventions and Other Discoveries* begins by examining the ties that bind the medical establishment to powerful pharmaceutical corporations. Then it details the struggle of the independent research against Orthodox Science and its code of conduct, the Scientific Method. Next, the book investigates the cover-up of information concerning UFOs and extraterrestrial life that's certain to make you reconsider what you thought was science fiction. The final section discusses just a few of

the numerous alternate energy resources and fuel savers that, if put on the market today, would soon run the fossil fuel monopolies out of business.

On Light and Other High Frequency Phenomena *Good Press*

On Light and Other High Frequency Phenomena is a lecture by Nikola Tesla. He presents his attempts to develop a wireless lighting system based on near-field inductive and capacitive coupling.

The Rock of the Lion *BoD - Books on Demand*

Reproduction of the original: The Rock of the Lion by Molly Elliot Seawell

The Vagrant Thoughts of a Wandering Man *Notion Press*

In this bouquet of poems I present to you my humble thoughts in simple words on a variety of topics. I have sung about the beauty of love. I have tried to let you

hear the sighs and sobs in silence of struggling and suffering people. I have expressed my concerns about our planet and the need to keep it clean and green. I have written about the bond between God and man and his despair despite the prayers he raises. I have also shown the dark side of humanity wondering how man can oppress, exploit, enslave and kill others and sadly, try to justify it. Here, you can hear the muffled, dying cries of a new born girl child. Some songs are my thoughts that loved to wander far on the wide wings of the flying wind. Through most of the poems on social themes I am appealing to the conscience of the people to abandon violence particularly against women, children and the weak and to build a beautiful world of peace and love. May

the humorous poems bring a smile on your face and laughter in your soul. Hope you will enjoy reading the book.

The Search for Free Energy

THE SCIENTIST, THE MADMAN, THE THIEF AND THEIR LIGHTBULB reveals the revolutionary work of inventors and scientists who have struggled to develop clean and 'fuelless' new ways to produce the electricity we need for the 21st century and beyond. If the technologies could be developed commercially, they would offer almost costless energy, which would mean the end of the oil economy and freely available electricity throughout the developed and underdeveloped world. THE SCIENTIST, THE MADMAN, THE THIEF AND THEIR LIGHTBULB contains the elements of a

dramatic conspiracy thriller in which greed, mendacity, murder, suicide, suppression, betrayal, jealousy, madness and misunderstood genius all play their full parts. It also investigates the complex psychology of invention and reserves a chapter for those inventors who are either self-deluded mavericks or charlatans who aim to trick gullible investors out of their savings. Most importantly, there are technologies here that offer to solve the planet's most serious problem: global warming and climate change caused by fossil fuel power plants and car emissions. Is the technological solution to global warming contained within these pages?

Weekly Options for Monthly Income

CreateSpace

Weekly Index Options became available on the Chicago Board of Options Exchange in 2003. I have watched this type of Options Trading evolve as more investors used weekly trading. The trading software I have developed adapted to the weeklies evolution. The software became simpler: It uses SPX for the weekly options My principle strategy for trading Weekly Index Options uses 2 sigma Condors: Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher; Short Puts 2 standard deviations below the market and the Long Puts the next

strike price lower. This is called 2 Sig Iron Condors. I have developed a tactic to make weekly profits in spite of the huge daily Up and Down movements in the SPX. SelfAdapSPXweeklyVLTy is the name of my software which I use to generate monthly income. The software described in this book uses only SPX for the options because I discovered that when I used other underlying stocks or indices such as Google and SPY, SPX usually finished best. This book describes how to use the TradeMonster real-time SPX quotes for computing the 2 sig Condors used in my Software: SelfAdapSPXweeklyVLTy. Trade Monster's affiliate OptionsHouse can be used for Weekly Options trading if you have a minimum of \$2,000 in the account. I use 1/4 of the capital = \$500

for Margin to generate about \$100 for the week or \$400 for the Month. In other words you get 90% return per month on \$500 margin. Remember the weekly in-out trades should be no more than 2 per week to avoid being designated a day trader by your broker which requires a minimum of \$25,000 in your account.

Einstein Was Wrong!

But So Was Newton *Createspace Independent Publishing Platform*

[Note: The most complete version of the big picture that eluded Einstein in his attempts to unveil a unified field theory can be found in the book, *The Gravity Cycle*, by the same author as this book. This book, *Einstein Was Wrong!*, was one of many approaches to the ideas that will shake the very foundations of physical science upon which we presently stand.] Modern Physics is built

on an erroneous foundation. If we are to take physics to a new level where gravity can be explained from an atomic/quantum perspective, then someone must boldly say, "Einstein was wrong, but so was Newton." Because they both started with the same wrong premise, their theories of gravity were destined to fall short in any attempt to connect them to atomic/quantum processes. And the same false premise that stifled Einstein in his ability to connect "the movement of planets and stars with the tiniest subatomic particles" prevents modern physicists from explaining the fourth and final force from an atomic/quantum perspective. Alas, "...when one starts with a wrong premise, no amount of patching can right the problem." But all is not lost. By

correcting Newton's mistake (the wrong premise), a new foundation for understanding the role of the atom in the momentum, relativity, and gravity of masses emerges in the form of two new theories: The Atomic Model of Motion (AMM) and The Galaxy Gravity Cycle

(GGC). These two theories combine to paint the big picture of how atomic/quantum processes are involved in holding a galaxy together, keeping planets orbiting stars, and preventing people from floating off into space. This book is dedicated to Occam's razor.
