Python Scripts for Abaqus - Learn by Example: Book Contents.

This is a good starting point to create a script. The first step towards creating a script is therefore to open Abaqus/CAE and do whatever needs to be automated there. In this case, I will create and save some images. As example files, I use 4 beams with different mesh densities. They are created using python scripting as described in Tutorial 25. The image I save involves 3 viewports with different outputs and views (Figure 1).
