Elementary Differential Geometry, Revised 2nd Edition ...

The geometrical study of a surface M in Euclidean space R^3 separates into three distinct categories: the intrinsic geometry of M , the shape of M in R^3 , and the Euclidean geometry of R^3 . Geometry of R^3 is based on the dot product and consists of those concepts preserved by the isometries of R^3 . The chapter emphasizes that the geometry of M is also based on the dot product—applied only to vectors tangent to M —and that it consists of those features preserved by the isometries of M .
