Windows Graphics Programming with Borland C++ by Loren ...

The Borland Graphics Interface, also known as BGI, is a graphics library bundled with several Borland compilers for the DOS operating systems since 1987. BGI was also used to provide graphics for many other Borland products including the Quattro spreadsheet. The library loaded graphic drivers and vector fonts from disk in order to provide device independent graphics support. It was possible for the programmer to embed the graphic driver into the executable file by linking the graphic driver as o

Borland Graphics Interface - Wikipedia

Borland C++'s compiler is actually named "bcc32" and it is located in the "c:\borland\bcc55\bin" directory; the below instructions will take you through compiling your first program. Compiling the program. Go to start, click on run, and type "Command", and hit enter. Now, type "cd c:\borland\bcc55\bin" and hit enter.
