Edwin Powell Hubble (November 20, 1889 – September 28, 1953)

was an American astronomer. He played a crucial role in establishing the fields of extragalactic astronomy and observational cosmology.. Hubble proved that many objects previously thought to be clouds of dust and gas and classified as "nebulae" were actually galaxies beyond the Milky Way. He used the strong direct relationship ...

Edwin Hubble - Wikipedia

Ripened by experience, energetic, disciplined, and a skillful observer, Hubble soon established some of the most important ideas in modern astronomy. He showed that other galaxies existed, classified them on the basis of their shapes, found a pattern to their motion (and thus put the notion of an expanding universe on a firm observational footing), and began a lifelong program to study the distribution of galaxies in the universe.
