Electric Motors Self Study Guide

There are magnets attached to both an external stationary stator, and an internal rotor. The rotor is able to move because the current is reacting to the magnetic poles, creating a rotating magnetic field. There are many different types of AC motors, and the most common ones are mentioned below: Induction Motors, also known as asynchronous motors,

rely solely on AC as a power source. An induced current occurs in the rotor conductors and is caused by the interaction between the rotor and the ...
