In this perspective, a multifunctional composite is defined as 'made of two or more materials that perform two or more functions in a manner that is constructive to the overall purpose of the structure' where there is no differentiation between structural or non-structural functions.

Multifunctional Materials - IOPscience

Multifunctional Materials and Their Impact on Sustainability. Multifunctional materials are the materials that perform multiple functions in a system due to their specific properties. Multifunctional materials can be both naturally existing and specially engineered. For example, some traditional materials

that provide, for instance, high mechanical strength can be modified at the nanoscale to attain other properties such as energy absorption, self-healing, etc.
