Biointegration Of Medical Implant Materials

Biointegration of medical implant materials provides a unique and comprehensive review of recent

techniques and research into material and tissue interaction and integration. Part one discusses soft tissue biointegration with chapters on the biocompatibility of engineered stem cells, corneal tissue engineering and vascular grafts.

Biointegration of Medical Implant Materials | ScienceDirect

Abstract All materials intended for application in humans as biomaterials, medical devices, or prostheses undergo tissue responses when implanted into living tissue. Similarly, when blood contacts a biomaterial surface, a variety of blood components interfere with the surface leading to thrombosis or complement activation.
