He was most likely helped by his brother, James. After testing the clock on the River Humber, Harrison proudly brought it to London in 1735. It was installed in Graham's workshop, to be shown to London's scientific community. At last, it seemed, here was a timekeeper that might be used to determine longitude at sea.

John Harrison's H4 clock | How Longitude was found | Royal ...

Directed by Charles Sturridge. With Jeremy Irons, Anna Chancellor, Emma Kay, Samuel West. In two parallel stories, the clockmaker John Harrison builds the marine chronometer for safe navigation at sea in the 18th Century and the horologist Rupert Gould becomes obsessed with restoring it in

the 20th Century.

Longitude (TV Movie 2000) - IMDb

A marine chronometer is a timepiece that is precise and accurate enough to be used as a portable time standard; it can therefore be used to determine longitude by means of accurately measuring the time of a known fixed location, for example Greenwich Mean Time and the time at the current location. When first developed in the 18th century, it was a major technical achievement, as accurate knowledge of the time over a long sea voyage is necessary for navigation, lacking electronic or communication

Marine chronometer - Wikipedia

John Harrison was a self-educated

English carpenter and clockmaker who invented the marine chronometer, a long-sought-after device for solving the problem of calculating longitude while at sea. Harrison's solution revolutionized navigation and greatly increased the safety of long-distance sea travel. The problem he solved was considered so important following the Scilly naval disaster of 1707 that the British Parliament offered financial rewards of up to £20,000 under the 1714 Longitude Act. In

John Harrison - Wikipedia

For many years, there weren't many fish. At one time, the Aral Sea in Central Asia was the fourth largest lake in the world. It had an area of 67,300 square kilometres. Two of the biggest rivers in

Central Asia, the Amu Darya and the Syr Darya, went into the Aral Sea. But the water almost disappeared. The Aral Sea was a busy place.

The Story of the Aral Sea | NGL Life

Marking the 300th anniversary of the passing of the Longitude Act in July 1714, Ships, Clocks & Stars - which ran from 11 July 2014 to 4 January 2015 - told the extraordinary story of the race to determine longitude (east-west position) at sea, helping to save seafarers from terrible fates including shipwreck and starvation. The exhibition drew on the latest research to shed new light on the history of longitude - one of the great achievements of the Georgian age.
