7 Ways To Add Massive Value To Your Business

It is common to report statistically significant p-values with an asterisk. Let's say, for example, you want to report p-values at the .05 level — any number below this threshold should be followed by an asterisk. You can use conditional formatting in Excel to automate this process. Want to really automate the process?

Excel Conditional Formatting for Statistical Significance

The level of statistical significance is often expressed as a p-value between 0 and 1. The smaller the p-value, the stronger the evidence that you should reject the null hypothesis. A p-value less than 0.05 (typically ≤ 0.05) is statistically significant. It indicates strong evidence against the null hypothesis, as there is less than a 5% probability the null is correct (and the results are random).

How to Add Significant Value to Your House - FeedsPortal.com

They can be treated as if they had an infinite number of significant figures. For example, when using the speed conversion, you need to multiply the value in m/s by 3.6 if you want to obtain the value in km/h. The number of

significant figures is still determined by the accuracy of the initial speed value in m/s - for example, $15.23 \times 3.6 = 54.83$.

Significant Figures Calculator - Sig Fig

Once you have set a threshold significance level (usually 0.05), every result leads to a conclusion of either "statistically significant" or not "statistically significant". Some statisticians feel very strongly that the only acceptable conclusion is significant or 'not significant', and oppose use of adjectives or asterisks to describe values levels of statistical significance.

Adding Value in Research. The NIHR has developed the Adding Value in Research model to ensure that our research answers the most important questions and is appropriately designed, efficiently delivered, unbiased, published in full, appropriately disseminated, and usable.

Adding value in research | NIHR

If $P > .01$ then the P value should always be expressed to 2 digits whether or not it is significant. When rounding, 3 digits is acceptable if rounding would change the significance of a value (eg, you may

write $P = .049$ instead of $.05$). If $P < .01$, it should be expressed to 3 digits.
