Essentials of Executive Functions Assessment *John Wiley & Sons*

Written by experts in the area of executive functioning, *Essentials of Executive Functions Assessment* equips mental health practitioners (school, clinical, developmental/pediatric, neuropsychologists, educational diagnosticians, and educational therapists) with all the information they need to administer, score, and interpret assessment instruments that test for executive functions deficits associated with a number of psychiatric and developmental disorders.

Behavior Rating Inventory of Executive Function

BRIEF

Handbook of Executive Functioning

Springer Science & Business Media
Planning. Attention. Memory. Self-regulation. These and other core cognitive and behavioral operations of daily life comprise what we know as executive functioning (EF). But despite all we know, the concept has engendered multiple, often conflicting definitions and its components are sometimes loosely defined and poorly understood. The *Handbook of Executive Functioning* cuts through the confusion, analyzing both the whole and its parts in comprehensive, practical detail for scholar and clinician alike. Background chapters examine influential models of EF, tour the brain geography of the executive system and pose salient developmental questions. A section on practical implications relates early

deficits in executive functioning to ADD and other disorders in children and considers autism and later-life dementias from an EF standpoint. Further chapters weigh the merits of widely used instruments for assessing executive functioning and review interventions for its enhancement, with special emphasis on children and adolescents. Featured in the Handbook: The development of hot and cool executive function in childhood and adolescence. A review of the use of executive function tasks in externalizing and internalizing disorders. Executive functioning as a mediator of age-related cognitive decline in adults. Treatment integrity in interventions that target executive function. Supporting and strengthening working memory in the

classroom to enhance executive functioning. The Handbook of Executive Functioning is an essential resource for researchers, scientist-practitioners and graduate students in clinical child, school and educational psychology; child and adolescent psychiatry; neurobiology; developmental psychology; rehabilitation medicine/therapy and social work.

Assessment and Intervention for Executive Function Difficulties *Taylor & Francis*

In *Assessment and Intervention for Executive Function Difficulties*, McCloskey, Perkins, and Diviner provide a unique blend of theory, research, and practice that offers clinicians an overarching framework for the concept

of executive functions (EFs) in educational settings. The conceptual model of executive functions is detailed, including their role in behavior, learning, and production across all settings. The heart of the book focus on the practical issues involved in the use of assessment tools, tests, report writing, and the implementation and follow-up of targeted interventions using the EF model. Six case studies are introduced in Chapter 1 and followed throughout the book, building understanding of the executive function difficulties of each child, assessment for identifying the difficulties, and interventions for dealing with the difficulties. An additional case study is discussed in detail in one of the concluding chapters, and a companion CD will provide the practitioner with a

wealth of assessment forms, parent and teacher handouts, behavior tracking charts, and report/documentation forms.

Assessing the Behavioral Aspects of Executive Functioning Across the Lifespan

Review of Rating Scales and Psychometric Derivation of a Screener for Young Adults

Executive functioning skills are paramount to our ability to purposefully and successfully mediate our actions within our day-to-day environment. Dysfunction of the executive system can result in a multitude of behavioral manifestations in all stages of life. Increasing evidence supports the use of rating scales to obtain a more

comprehensive and ecologically valid understanding of an individual's executive functioning. The current thesis involves two articles examining the use of behavioral rating scales in the assessment of executive functions. Study 1: In response to a recent proliferation of executive functions rating scales, this article reviews and discusses currently available scales for the assessment of executive functions across the lifespan. Study 2: This study derived an executive functions screener from the Behavioral Assessment System for Children (BASC-2-SRP-COL) for use in young adults and evaluated it against a well-known executive function rating scale (the Behavior Rating Inventory of Executive Function-Adult Version).

Psychological and Developmental Assessment

Children with Disabilities and Chronic Conditions *Guilford Press*

This volume presents an integrative framework for conducting individualized assessments of children and adolescents with a wide range of disabilities and chronic conditions. Expert contributors first provide an overview of the field, reviewing general strategies and approaches to developmental assessment. The volume then addresses the issues that arise in working with young people with particular challenges, including motor impairments, auditory and visual impairments, autism, chronic health conditions, neurological problems, and exposure to trauma. Described are

concepts and tools to guide the practitioner in deriving an accurate diagnosis, planning appropriate interventions in clinic or school, evaluating progress, and monitoring treatment outcomes. Structured in a cohesive format, chapters review the nature of each condition and its implications for health, development, and functioning at different ages and in various domains. The uses of specific assessment instruments are considered, and needed modifications in settings, tasks, and procedures identified. Emphasizing methods that are flexible and multidimensional, the volume includes numerous illustrative case vignettes.

Barkley Deficits in Executive Functioning Scale (BDEFS) *Guilford Press*

The Barkley Deficits in Executive Functioning Scale (BDEFS) is an empirically based tool for evaluating dimensions of adult executive functioning in daily life. Evidence indicates that the BDEFS is far more predictive of impairments in major life activities than more time-consuming and costly traditional EF tests. The BDEFS offers an ecologically valid snapshot of the capacities involved in time

management, organization and problem solving, self-restraint, self-motivation, and self-regulation of emotions. It comprises both self- and other-reports in a long form (15-20 minutes) and a short form (4-5 minutes). Special features include an adult ADHD risk index in the long form. Complete instructions for scoring and interpreting the scale are provided. See also the Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA) and Barkley's authoritative book on EF development and deficits, *Executive Functions*. Also available: Barkley Adult ADHD Rating Scale--IV (BAARS-IV) and Barkley Functional Impairment Scale (BFIS for Adults). Includes Permission to Photocopy Enhancing the convenience and value of the BDEFS, the limited

photocopy license allows purchasers to reproduce the forms and score sheets and yields considerable cost savings over other available scales. The large format and sturdy wire binding facilitate photocopying.

Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA) *Guilford Press*

The Barkley Deficits in Executive Functioning Scale--Children and Adolescents (BDEFS-CA) is an empirically based tool for evaluating clinically significant dimensions of child and adolescent executive functioning. Evidence indicates that the BDEFS-CA is far more predictive of impairments in daily life activities than more time-

consuming and costly traditional EF tests. The BDEFS-CA offers an ecologically valid snapshot of the capacities involved in time management, organization and problem solving, self-restraint, self-motivation, and self-regulation of emotions. Two parent-report forms are included: a long form (10-15 minutes) and a short form (3-5 minutes). There is also a short clinical interview form based on the short-form rating scale, for use in unusual circumstances where a parent is unable to complete a rating scale. Special features include an ADHD risk index in the long form. Complete instructions for scoring and interpreting the scale are provided. Assessing Deaf College Students with Attention Deficit Hyperactivity Disorder

Behavior Rating Inventory of Executive Function-- Adult Version Versus CAARS

"This study examined the sensitivity of two instruments used in assessing Attention Deficit Hyperactivity Disorder (ADHD) with deaf individuals. Forty deaf college students, 20 with a diagnosis of ADHD and 20 controls, completed the Behavior Rating Inventory of Executive Function -- Adult Version (BRIEF-A) and the Connors' Adult ADHD Rating Scale (CAARS). An analysis of variance (ANOVA), multivariate analyses of variance (MANOVA), and sensitivity, specificity, and predictive value analyses found that both the BRIEF-A and CAARS were adequate behavior rating scales for measuring ADHD symptoms in a deaf population. Results also revealed that

the BRIEF-A was a more specific measure whereas the CAARS was a more sensitive measure."--Abstract.
