Unholy Grails

A New Road to Wealth *Radge Publishing*

What's the fastest way to lose money? Follow the herd. Nick Radge stopped following the herd many years ago. As a trader and stock broker, Nick learnt to recognise what the herd were doing and how they react to financial information. He also realised that it made no sense. Are you one of the herd? Here's a test: If a stock's price is falling do you think it represents good value, i.e. it's cheap? OneTel and HIH were not cheap when they eventually delisted in 2001. ABC Learning was not cheap when it delisted in 2008. How about Bear Sterns, Lehman Brothers,

Trump Entertainment or Kodak? Billabong does not look cheap at the moment! A stock price in motion tends to stay in motion; Unholy Grails will show you how to be on the positive side of this statement. Nick Radge is focused on momentum investing; purchasing stocks that are trending up. Nick shows you how to hitch a ride on stocks in an uptrend or protect your capital during sustained bear markets. Unholy Grails goes against almost everything your stock broker, financial planner and your fund manager will ever tell you. Considering that in 2008 capital managed by fund managers dropped up to 50% we are in desperate need of an alternative way of

thinking. In *Unholy Grails*, Nick Radge details a road less travelled; a compilation of practical strategies for investors looking for long term gains with minimum daily effort. “I am shocked that so many Mum and Dad investors were financially and emotionally battered during the GFC. The financial planners and fund managers they were relying on for advice gave them no advice: just the same old ‘buy and hold’ strategy that simply does not work in a collapsing market. In *Unholy Grails* I define specific strategies for investors, allowing them to manage their own investments and stop paying fees to financial planners and advisors,” said the author, Nick Radge.

Whether investing for your retirement or using an active investment strategy to manage your personal wealth, Nick Radge examines and tests numerous investment strategies to help determine the right one for you. Don’t expect the same old, worn out advice from Nick Radge. His latest book is not called *Unholy Grails* for nothing!

Investing with Volume Analysis

Day Trading Options

Profiting from Price Distortions in Very Brief Time Frames *FT Press*

How you can earn remarkable profits right now by trading in very brief time frames!

- Forget 'buy and hold.' Look what it's

done to the investors who believed in it!

- Enter the market at very specific times, and structure trades that capitalize on proven pricing anomalies and distortions.
- Master day trading strategies that work in any market conditions, because they don't rely on financial predictions, company results, or market direction. Stock prices have lost all relationship to the underlying

performance of the companies they represent: investors who relied on traditional 'buy and hold' strategies have been savaged by the greatest destruction of wealth in the history of the world. But some options traders are earning immense

profits right now, even in this generation's worst market and they'll keep profiting no matter how the market moves. How? They trade at very specific times and structure trades to capitalize on well-characterized pricing anomalies and distortions. By doing so, they can generate more profit in one day than most experienced investors realize in a month, sometimes even a year. What's more, they systematically minimize exposure to market risk, including potentially disastrous after-hour market moves. In *Day Trading Options*, top options trader Jeff Augen shows exactly how you can use these strategies, too. You'll learn why day trading

options is more practical than ever, and understand trends in the options market that have leveled the playing field between large institutions and private traders. Augen reveals how to choose candidates for day trading; use new technical indicators that work; spot mispriced options; exploit rapid changes in implied volatility, and much more. Above all, you'll learn how to structure positions that close profitably before the end of trading, so end the day wealthier and more secure than you were in the morning. Jeff Augen, currently a private investor and writer, has spent over a decade building a unique intellectual property portfolio of algorithms and

software for technical analysis of derivatives prices. His work includes over 1 million lines of computer code reflecting powerful new strategies for trading options. As founding executive of IBM's Life Sciences Computing business, he defined a growth strategy resulting in \$1.2B of new revenue, and managed \$200M in venture investments. His books include *Trading Options at Expiration*, *The Options and The Volatility Edge in Options Trading*, and *Trader Workbook*.

The Alpha Formula

Beat the Market with Significantly Less Risk

The Alpha Formula is a combination of: Quantitative Investment Strategies, Behavioral Finance, and Applying First Principles to portfolio construction. In this book we will touch on a handful of the most pervasive behavioral biases that befall investors and how they can lead to certain, predictable, repeatable market behavior. We will then

use this market behavior to construct four minimally correlated trading strategies, complete with rules and historical test results. Each strategy attacks a First Principle, or self-evident truth, about the market. This results in strategies that are inherently different and uncorrelated. Finally, combining our four strategies leads us to The Alpha Formula portfolio.
