CICS TS for z/OS 4.2: Application Programming Guide

IBM CICS is a family of mixed language application servers that provide online transaction management and connectivity for applications on IBM mainframe systems under z/OS and z/VSE. CICS family products are designed as middleware and support rapid, high-volume online transaction processing. A CICS transaction is a unit of processing initiated by a single request that may affect one or more objects. This

processing is usually interactive, but background transactions are possible. CICS Transaction
