There is software available for item response theory, but it is very hard for me to understand how they work. Can anyone provide information on this.

Can anyone provide help using software for item response ...

BILOG-MG 3 was used for estimation of item parameters. All other calculations were performed in R 2.11.1. In each combination of experimental factors, 100 replications were performed. The maximum number of cycles was increased because of the stricter convergence criteria used (10000 EM cycles, 10 Newton cycles).
