History of Cell Biology | Cell Structure Quiz - Quizizz

Cell, in biology, the basic membrane-bound unit that contains the fundamental molecules of life and of which all living things are composed. A single cell may be a complete organism in itself, such as a bacterium, or it may acquire a specialized function, becoming a building block of a multicellular organism.

cell | Definition, Types, & Functions | Britannica

An example of the relationship between those two factors was the discovery of the cell. For hundreds of years there had been

speculation concerning the basic structure of both plants and animals. Not until optical instruments were sufficiently developed to reveal cells, however, was it possible to formulate a general hypothesis , the cell theory, that satisfactorily explained how plants and animals are organized.
