Networked Audio Systems | B&H

Photo Video

Networked audio simply defined is transmitting audio in a digital format from one place to another over some sort of network. With standard copper wire, we have long, heavy, unwieldy snakes and cable runs from the stage to the console. One hardwired jack connects to one channel on the console. To reroute the audio, we physically unplug the cable and move it into another input or output. The “networked” part of networked audio means that we can route a signal digitally without physically ...

In audio and broadcast engineering, Audio over Ethernet (sometimes AoE —not to be confused with ATA over Ethernet) is the use of an Ethernet - based network to distribute real-time digital audio. AoE replaces bulky snake cables or audio-specific installed low-voltage wiring with standard network structured cabling in a facility.
