1. Algorithmic Thinking, Peak Finding - YouTube

To develop a good understanding of a data structure requires three things: first, you must learn how the information

is arranged in the memory of the computer; second, you must become familiar with the algorithms for manipulating the information contained in the data structure; and third, you must understand the performance characteristics of the data structure so that when called upon to select a suitable data structure for a particular application, you are able to make an appropriate decision.
