Geometry And The Imagination

Geometry and the Imagination is the English translation of the 1932 book *Anschauliche Geometrie* by David Hilbert and Stephan Cohn-Vossen. The book was based on a series of lectures Hilbert made in the winter of 1920–21. The book is an attempt to present some then-current mathematical thought to "contribute to a more just appreciation of mathematics by a wider range of people than just the specialists."
