The Forest Inventory and Analysis Database

A manual database is a hard-file storage system that consists of paper records, folders and filing cabinets or storage boxes. A quality manual database system

makes it easy to retrieve documents and information when they are needed.

Another term for a manual database is a document management system. The Environmental Protection Agency recommends organizing a manual database alphabetically, chronologically, numerically or with an alphanumeric system.

What Is an Example of a Manual Database?

A manual database is a paper based database. A computerized database is one which is held on a computer in an organised manner. A computerized database is more advantageous than manual database in...

What are the examples of manual database? - Answers

Database, also called electronic database, any collection of data, or information, that is specially organized for rapid search and retrieval by a computer. Databases are structured to facilitate the storage, retrieval, modification, and deletion of data in conjunction with various data-processing operations. A database management system (DBMS) extracts information from the database in response to queries.
