Patterson Fire Pumps Curves - app.wordtail.com

I don't recommend using pump curves to select fire pumps, as every selection must be UL approved, which might lead to picking the wrong horsepower for a particular selection. One other note on fire pump selection is that selecting pumps that have a higher rpm is not necessarily a misstep, because fire pumps only run once a week for a limited amount of time, so the length of life will be ...

Centrifugal Pump Curves

The pump performance curve describes the relation between the flowrate and the head for the actual pump. Other important information for a proper pump selection is also included - like efficiency curves, NPSH r curve, pump curves for several impeller diameters and different speeds, and power consumption.

System Curve and Pump Performance Curve

Four types of Patterson pumps are effective in fire control systems: the Horizontal Split Case, the Vertical Turbine, the Vertical In-line and the End Suction. These fire pumps operate with pressures in excess of 390 psi and up to 5,000 GPM. Patterson Fire Pumps conform to, and in some cases surpass, the rigid standards set forth by approving and listing authorities. They are UL and ULC/cUL listed ...
