When *Breath Becomes Air* by Paul Kalanithi | Summary & Analysis Preview: When *Breath Becomes Air* is a memoir about Paul Kalanithi's experiences as a doctor and as a terminally ill patient. The book discusses Kalanithi's lifelong fascination with questions of human biology, mortality, and meaning. It then examines how these questions are intensified by the author's own confrontation with lung cancer, sickness, and death. Kalanithi's father was a doctor from New York City; his mother was from India. The family moved to Kingman, Arizona, so that his father could pursue his medical career when Paul was young. His father worked long hours and was rarely home, which convinced young Paul that the last thing he wanted to do was to become a doctor himself. Paul's mother was concerned about the weak school system in Kingman, and so crafted a lengthy list of literary classics which she made Paul and his brothers read. As a result, Paul became enthralled with literature. He planned to become a writer... PLEASE NOTE: This is summary and analysis of the book and NOT

The Bright Hour

A Memoir of Living and Dying *Simon and Schuster*

"Built on her wildly popular Modern Love column, 'When a Couch is More Than a Couch' (9/23/2016), a breathtaking memoir of living meaningfully with 'death in the room' by the 38 year old great-great-great granddaughter of Ralph Waldo Emerson, mother to two young boys, wife of 16 years, after her terminal cancer diagnosis"--

When Breath Becomes Air (Indonesian Edition) *Bentang Pustaka*

Pada usia ketiga puluh enam, Paul Kalanithi merasa suratan nasibnya berjalan dengan begitu sempurna. Paul hampir saja menyelesaikan masa pelatihan luar biasa panjangnya sebagai ahli bedah saraf selama sepuluh tahun. Beberapa rumah sakit dan universitas ternama telah menawari posisi penting yang diimpikannya selama ini. Penghargaan nasional pun telah diraihnya. Dan kini, Paul hendak kembali menata ikatan pernikahannya yang merenggang, memenuhi peran sebagai sosok suami yang ia janjikan. Akan tetapi, secara tiba-tiba, kanker mencengkeram paru-parunya, melumpuhkan organ-organ penting dalam tubuhnya. Seluruh masa depan yang direncanakan Paul seketika menguap. Pada satu hari ia adalah seorang dokter yang menangani orang-orang yang sekarat, tetapi pada hari

berikutnya, ia adalah pasien yang mencoba bertahan hidup. Apa yang membuat hidup berharga dan bermakna, mengingat semua akan sirna pada akhirnya? Apa yang Anda lakukan saat masa depan tak lagi menuntun pada cita-cita yang diidamkan, melainkan pada masa kini yang tanpa akhir? Apa artinya memiliki anak, merawat kehidupan baru saat kehidupan lain meredup? When Breath Becomes Air akan membawa kita bergelut pada pertanyaan-pertanyaan penting tentang hidup dan seberapa layak kita diberi pilihan untuk menjalani kehidupan. Admissions

Life as a Brain Surgeon *Thomas Dunne Books*

The 2017 National Book Critics Circle (NBCC) Finalist, International Bestseller, and a Kirkus Best Nonfiction Book of 2017! "Marsh has retired, which means he's taking a thorough inventory of his life. His reflections and recollections make Admissions an even more introspective memoir than his first, if such a thing is possible." —The New York Times "Consistently entertaining...Honesty is abundantly apparent here--a quality as rare and commendable in elite surgeons as one suspects it is in memoirists." —The Guardian "Disarmingly frank storytelling...his reflections on death and dying equal those in Atul Gawande's excellent Being Mortal." —The Economist Henry Marsh has spent a lifetime operating on the surgical frontline. There have been exhilarating highs and devastating lows, but his love for the practice of neurosurgery has never wavered. Following the

publication of his celebrated New York Times bestseller *Do No Harm*, Marsh retired from his full-time job in England to work pro bono in Ukraine and Nepal. In *Admissions* he describes the difficulties of working in these troubled, impoverished countries and the further insights it has given him into the practice of medicine. Marsh also faces up to the burden of responsibility that can come with trying to reduce human suffering. Unearthing memories of his early days as a medical student, and the experiences that shaped him as a young surgeon, he explores the difficulties of a profession that deals in probabilities rather than certainties, and where the overwhelming urge to prolong life can come at a tragic cost for patients and those who love them. Reflecting on what forty years of handling the human brain has taught him, Marsh finds a different purpose in life as he approaches the end of his professional career and a fresh understanding of what matters to us all in the end.

Gratitude *Knopf*

"My predominant feeling is one of gratitude. I have loved and been loved. I have been given much and I have given something in return. Above all, I have been a sentient being, a thinking animal, on this beautiful planet, and that in itself has been an enormous privilege and adventure." —Oliver Sacks No writer has succeeded in capturing the medical and human drama of illness as honestly and as eloquently as Oliver Sacks. During the last few months of his life, he wrote a set of essays in which he movingly explored his feelings about completing a life and coming to terms with his own death. "It is the fate of every human being," Sacks writes, "to be a unique individual, to find his own path, to live his

own life, to die his own death." Together, these four essays form an ode to the uniqueness of each human being and to gratitude for the gift of life. "Oliver Sacks was like no other clinician, or writer. He was drawn to the homes of the sick, the institutions of the most frail and disabled, the company of the unusual and the 'abnormal.' He wanted to see humanity in its many variants and to do so in his own, almost anachronistic way—face to face, over time, away from our burgeoning apparatus of computers and algorithms. And, through his writing, he showed us what he saw." —Atul Gawande, author of *Being Mortal*

Do No Harm

Stories of Life, Death, and Brain Surgery *Macmillan*

A New York Times Bestseller Shortlisted for both the Guardian First Book Prize and the Costa Book Award Longlisted for the Samuel Johnson Prize for Non-Fiction A Finalist for the Pol Roger Duff Cooper Prize A Finalist for the Wellcome Book Prize A Financial Times Best Book of the Year An Economist Best Book of the Year A Washington Post Notable Book of the Year What is it like to be a brain surgeon? How does it feel to hold someone's life in your hands, to cut into the stuff that creates thought, feeling, and reason? How do you live with the consequences of performing a potentially lifesaving operation when it all goes wrong? In neurosurgery, more than in any other branch of medicine, the doctor's oath to "do no harm" holds a bitter irony. Operations on the brain carry grave risks. Every day, leading neurosurgeon Henry Marsh must make agonizing decisions, often in the face of great urgency and uncertainty. If you believe that

brain surgery is a precise and exquisite craft, practiced by calm and detached doctors, this gripping, brutally honest account will make you think again. With astonishing compassion and candor, Marsh reveals the fierce joy of operating, the profoundly moving triumphs, the harrowing disasters, the haunting regrets, and the moments of black humor that characterize a brain surgeon's life. *Do No Harm* provides unforgettable insight into the countless human dramas that take place in a busy modern hospital. Above all, it is a lesson in the need for hope when faced with life's most difficult decisions.

Being Mortal

Medicine and What Matters in the End *Metropolitan Books*

#1 New York Times Bestseller In *Being Mortal*, bestselling author Atul Gawande tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the

desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end.

**When Breath Becomes Air - Summarized for Busy People:
Based On the Book By Paul Kalanithi** *Lulu Press, Inc*

Paul Kalanithi was diagnosed with stage IV metastatic lung cancer at the age of thirty-six, just nearing his ten-year mark as a neurosurgeon in training. His diagnosis changed everything, including the future that he and his wife, Lucy, had envisioned. *When Breath Becomes Air* is Kalanithi's account of his transition from being a young medical student fixated on answering the profound question about what makes one's life meaningful in spite of the certainty of death, to a trained neurosurgeon in charge of one's source of identity—the human brain, and ultimately to a man welcomed to fatherhood as well as to the realization of his mortality. What makes life worthwhile when death is but an inevitability? How will you move forward when the future you have imagined crumbles into an impasse? Why bring new life into the world when your own is slipping right between your fingers? These are only some of the thought-provoking questions Kalanithi presents in this masterfully written memoir.

Fighting Cancer

A Nontoxic Approach to Treatment *North Atlantic Books*

Fighting Cancer describes the Gorter Model, an integrative, nontoxic approach to cancer treatment that mobilizes the immune system. It was developed by Robert Gorter, MD, PhD, who in 1976 recovered from Stage IV testicular cancer by using nontoxic treatment and no chemotherapy or radiation. Based on self-experience, extensive research, and decades of clinical practice, the treatment consists of supporting the immune system using fever therapy (hyperthermia), inoculation with immune cells, the use of the botanical mistletoe (*Viscum album*)—the single most commonly prescribed anti-cancer medication in much of Europe—supportive nutrients, and diet and lifestyle changes. Organized into three parts, *Fighting Cancer* presents a clear overview of the model, the research behind it, and strategies for strengthening natural immunity. Emphasizing stress reduction and minimizing toxic exposure, the authors provide practical guidance for patients: questions to ask doctors after diagnosis and advice for evaluating options, gathering information, and getting second opinions. Included are powerful testimonials from patients—most of whom have outlived their

prognosis and, in some cases, achieved complete and sustained remission.

Life After Life

A Novel *Reagan Arthur Books*

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she? Darkly comic, startlingly poignant, and utterly original -- this is Kate Atkinson at her absolute best.

PLEASE NOTE: This is a key takeaways and analysis of the book and NOT the original book. Start Publishing Notes' Summary, Analysis, and Review of Paul Kalanithi's *When Breath Becomes Air* includes: Summary of the book A Review Analysis & Key Takeaways A detailed "About the Author" section Preview: Dr. Paul Kalanithi's *When Breath Becomes Air* is an autobiographical account of his experience with Stage IV lung cancer. Part memoir, part guidebook, and part philosophical investigation, the book is the story of his life, his work, and the difficult-but ultimately rewarding-process of coming to terms with his own death. It is difficult to separate *When Breath Becomes Air* from the

circumstances surrounding its publication. The tragic ironies of Kalanithi's situation—a non-smoker with lung cancer, a young man with an aggressive terminal illness, a talented surgeon who fell ill before he could realize his potential, a new father whose daughter will never know him—could not pull at readers' heartstrings more if it had been engineered in a lab. The fact that portions of the book were published as essays at high-profile media outlets like the New York Times while Kalanithi was still alive means that many readers will come to the text with a certain level of emotional investment. The book's publication, which was posthumous, as well as Kalanithi's dedication to writing it in the midst of his swift decline, lend his words a poignancy that's undeniable.

The Anatomy of Hope

How People Prevail in the Face of Illness *Random House Trade Paperbacks*

Why do some people find and sustain hope during difficult circumstances, while others do not? What can we learn from those who do, and how is their example applicable to our own lives? *The Anatomy of Hope* is a journey of inspiring discovery, spanning some thirty years of Dr. Jerome Groopman's practice,

during which he encountered many extraordinary people and sought to answer these questions. This profound exploration begins when Groopman was a medical student, ignorant of the vital role of hope in patients' lives—and it culminates in his remarkable quest to delineate a biology of hope. With appreciation for the human elements and the science, Groopman explains how to distinguish true hope from false hope—and how to gain an honest understanding of the reach and limits of this essential emotion.

Stuff They Don't Want You to Know *Flatiron Books*

Hosts of the podcast *Stuff They Don't Want You to Know*, Ben Bowlin, Matthew Frederick, & Noel Brown discern conspiracy fact from fiction regarding "stuff" the government doesn't want you to know. Conspiracies didn't always seem so clear and present. It used to be that people with tin-foil hats who were convinced of secret messages coming through the radio were easily disregarded as kooks and looney tunes. But these days, conspiracies feel alive and well. From internet rumors to lying politicians to the tinderbox that is social media, it's become remarkably clear that a vast swath of people believe really bonkers things. Why is that? How did these theories proliferate? Is there a kernel of truth to it or are they fully fiction? Ben Bowlin, Matt Frederick, and Noel Brown are the hosts of the popular iHeart podcast that seeks to answer these questions. With cool heads and extensive research, they regularly break down the wildest conspiracy theories: from chemtrails and biological testing to the secrets of lobbying and why the Kennedy assassination is of perennial interest. Written in smart, witty, and

conversational style, and with amazing illustrations, *Stuff They Don't Want You to Know* is a vital book in helping to understand the unexplainable and use truth as a powerful weapon against ignorance, misinformation, and lies.

A Thousand Naked Strangers

A Paramedic's Wild Ride to the Edge and Back *Simon and Schuster*

A former paramedic's visceral, poignant, and mordantly funny account of a decade spent on Atlanta's mean streets saving lives and connecting with the drama and occasional beauty that lies inside catastrophe. In the aftermath of 9/11 Kevin Hazzard felt that something was missing from his life—his days were too safe, too routine. A failed salesman turned local reporter, he wanted to test himself, see how he might respond to pressure and danger. He signed up for emergency medical training and became, at age twenty-six, a newly minted EMT running calls in the worst sections of Atlanta. His life entered a different realm—one of blood, violence, and amazing grace. Thoroughly intimidated at first and frequently terrified, he experienced on a nightly basis the adrenaline rush of walking into chaos. But in his downtime, Kevin reflected on how people's facades drop away when catastrophe strikes. As his hours on the job piled up, he realized he was beginning to see into the truth of things. There is no pretense five beats into a chest compression, or in an alley next to a crack den, or on a dimly lit highway where cars have collided. Eventually, what had at first seemed impossible happened: Kevin acquired mastery. And in the process he was

able to discern the professional differences between his freewheeling peers, what marked each—as he termed them—as “a tourist,” “true believer,” or “killer.” Combining indelible scenes that remind us of life’s fragile beauty with laugh-out-loud moments that keep us smiling through the worst, *A Thousand Naked Strangers* is an absorbing read about one man’s journey of self-discovery—a trip that also teaches us about ourselves.

At Home with Grief

Continued Bonds with the Deceased *Routledge*

What would you say to a deceased loved one if they could come back for one day? What if you can’t just ‘move on’ from grief? *At Home with Grief: Continued Bonds with the Deceased* chronicles Blake Paxton’s autoethnographic study of his continued relationship with his deceased mother. In the 90s, Silverman, Klass, and Nickman argued that after the death of a loved one, the bond does not have to be broken and the bereaved can find many ways to connect with memories of the dead. Building on their work, many other bereavement scholars have discussed the importance of not treating these relationships as pathological and have suggested that more research is needed in this area of grief studies. However, very few studies have addressed the communal and everyday subjective experiences of continuing bonds with the deceased, as well as how our relationship with our grief changes in the long term. In this book, Blake Paxton shows how a community in southern Illinois continues a relationship with one deceased individual more than ten years after her death. Through this gripping autoethnographic account of his mother’s

struggles with a rare cancer, her death, and his struggles with sexuality, he poses possibilities of what might happen when cultural prescriptions for grief are challenged, and how continuing bonds with the dead may help us continue or restore broken bonds with the living.
