MENDELIAN GENETICS PROBLEMS

To provide a scientific context for our probability problems, we will use

examples from genetics. Genetics is almost unique among the sciences, in that its fundamental laws were stated as probability laws. Thus the probabilities we compute have a reality as long-run frequencies, and are not just subjective. For example, the probability a parent of blood-type O has a child of blood-type O is the proportion of times this event occurs among all children of all parents of blood type O.
