This standard specifies the requirements for the transmission shift position sequence, a starter interlock, and for a braking effect of automatic transmissions, to reduce the likelihood of shifting errors, to prevent starter engagement by the driver when

the transmission is in any drive position, and to provide supplemental braking at speeds below 40 kilometers per hour (25 miles per hour).

49 CFR § 571.102 - Standard No. 102; Transmission shift

...
A key interlock system can keep workers safe by locking the guards in place. The key to unlock and open these guards is retained in the machine power isolating switch. In this way, the only way to unlock and open the guards is to switch off the power. The locks on the guards retain the key when the guard is open.
