Albedo A Measure Of Pavement

Albedo is a measure of how much solar energy is reflected by a material. Pavements with lower albedo tend to

absorb more solar energy, resulting in higher pavement temperatures, whereas pavements with higher albedo typically absorb less solar energy, resulting in cooler pavement temperatures.

Albedo: A Measure of Pavement Surface Reflectance

Albedo Albedo is the measure of the fraction of solar energy reflected by the Earth's surface. Lighter color surfaces

reflect light and have a high albedo, while darker surfaces absorb light and have a low albedo. Rapid urbanization has changed land use and surface properties, which has an effect on climate regionally and even globally.

Albedo is the measure of the diffuse reflection of solar radiation out of the total solar radiation and measured on a scale from 0, corresponding to a black body that absorbs all incident radiation, to 1, corresponding to a body that reflects all incident radiation. Surface albedo is defined as the ratio of radiosity to the irradiance received by a surface. The proportion reflected is not only determined by properties of the surface itself, but also by the spectral and angular distribution of so

Albedo is a dimensionless fraction and is measured on a scale from 0 to 1. Albedo of 0 means no reflecting power of a perfectly black surface (none reflected, all absorbed), Albedo of 1 means perfect reflection of a perfectly white surface (100% reflected) [26, 27].

Albedo is measured on a scale of 0-1. A 0 means that the surface of a material absorbs all of the sunlight that hits it. A 1 means that a material reflects all of the light energy that hits it. In other words, a 1 on the albedo scale means 100 percent reflection.

Asphalt concrete, the most common material used for pavement, is dark and has a low albedo (a measure of solar reflectance). Cement concrete is lighter, and thus has a higher albedo, but it requires a high-temperature process that is considerably more energy- and carbon-intensive than making asphalt from petroleum.
