In applications where the driven machine presents a high starting load and/or there is a need to start with absolute minimal current draw, a wound rotor (or slip ring) motor can provide unparalleled starting performance. NHP offers a range of Australian made and industry proven fixed and moving electrode liquid resistance starters for use with low and medium voltage wound rotor motors from 200 kW.

Hello niallnz In an old motor shop we had a liquid starter that we used to load test our generators. We used a brine solution in it and controlled the resistance by moving 3 rods in and out of the brine. We didn't have to be very concerned about the Conductivity of the solution, because our primary need was to create a measurable load.
