The Boat of a Million Years *Open Road Media*

A New York Times Notable Book and Hugo and Nebula Award Finalist: This epic chronicle of ten immortals over the course of history "succeeds admirably" (The New York Times). The immortals are ten individuals born in antiquity from various cultures. Immune to disease, able to heal themselves from injuries, they will never die of old age—although they can fall victim to catastrophic wounds. They have walked among mortals for millennia, traveling across the world, trying to understand their

special gifts while searching for one another in the hope of finding some meaning in a life that may go on forever. Following their individual stories over the course of human history and beyond into a richly imagined future, "one of science fiction's most revered writers" (USA Today) weaves a broad tapestry that is "ambitious in scope, meticulous in detail, polished in style" (Library Journal).

Einstein's Shadow *HarperCollins*

A NEW YORK TIMES EDITOR'S CHOICE Einstein's Shadow follows a team of elite scientists on their historic mission to take the first picture of a black hole, putting Einstein's theory of relativity to its ultimate test and helping to answer our deepest questions about space, time, the origins of the universe, and the nature of reality. Photographing a black hole sounds impossible, a contradiction in terms. But Shep Doeleman and a global coalition of scientists are on the cusp of doing just that. With exclusive access to the team, journalist Seth Fletcher spent five years following Shep and an extraordinary cast of characters as they assembled the Event Horizon Telescope, a virtual radio observatory the size of the Earth. He witnessed their struggles, setbacks, and breakthroughs, and along the way, he explored the latest thinking on the most profound questions about black holes. Do they represent a limit to our ability to understand reality? Or will they reveal the clues that lead to the long-sought Theory of Everything? Fletcher transforms astrophysics into something exciting, accessible, and immediate, taking us on an incredible adventure to better understand the complexity of our galaxy, the boundaries of human perception and knowledge, and how the messy human endeavor of science really works. Weaving a compelling narrative account of human ingenuity with excursions into cutting-edge science, Einstein's Shadow is a tale of great minds on a mission to change the way we understand our universe—and our place in it.

Embassytown *Del Rey*

NEW YORK TIMES BESTSELLER In the far future, humans have colonized a distant planet, home to the enigmatic Ariekei, sentient beings famed for a language unique in the universe, one that only a few altered human ambassadors can speak. Avice Benner Cho, a human colonist, has returned to Embassytown after years of deep-space adventure. She cannot speak the Ariekei tongue, but she is an indelible part of it, having long ago been made a figure of speech, a living simile in their language. When distant political machinations deliver a new ambassador to Ariekei, the fragile equilibrium between humans and aliens is violently upset. Catastrophe looms, and Avice is torn between competing loyalties: to a husband she no longer loves, to a system she no longer trusts, and to her place in a language she cannot speak—but which speaks through her, whether she likes it or not. Praise for Embassytown "A breakneck tale of suspense . . . disturbing and beautiful by turns. I cannot emphasize enough how terrific this novel is. It's definitely one of the best books I've read in the past year, perfectly balanced between escapism and otherworldly philosophizing."—io9 "Embassytown is a fully achieved work of art. . . . Works on every level, providing compulsive narrative, splendid intellectual rigour and risk, moral sophistication, fine verbal fireworks and sideshows, and even the old-fashioned satisfaction of watching a protagonist become more of a person than she gave promise of being."—Ursula K Le Guin "The Kafkaesque writer journeys to the distant edges of the universe in his latest sci-fi thriller."—Entertainment Weekly "Utterly astonishing

. . . A major intellectual achievement.”—Kirkus Reviews “Brilliant storytelling . . . The result is a world masterfully wrecked and rebuilt.”—Publishers Weekly (starred review)

When We Cease to Understand the World is a book about the complicated links between scientific and mathematical discovery, madness, and destruction. Fritz Haber, Alexander Grothendieck, Werner Heisenberg, Erwin Schrödinger—these are some of luminaries into whose troubled lives Benjamín Labatut thrusts the reader, showing us how they grappled with the most profound questions of existence. Some of their discoveries reshape human life for the better; others pave the way to chaos and unimaginable suffering. The lines are never clear. At a breakneck pace and with a wealth of disturbing detail, Labatut uses the imaginative resources of fiction to tell the stories of the scientists and mathematicians who expanded our notions of the possible.

Excavate! *Faber & Faber*

This is a book about Mark E. Smith and The Fall - or more precisely, their ever-influential world. The Fall were so many things, so many worlds; if you got it (and not everyone did), they represented everything. 'To 50,000 Fall Fans: please buy this inspired & inspiring, profound & provocative, beautiful & bonkers Book of Revelations, choc-stock-full of loving Acts by true Apostles, simultaneously both the scrapbook you wished you'd kept and a portal to futures & pasts, known & unknown, & a Fantastic Celebration of this Nation's Saving Grace.' DAVID PEACE 'Mind blowing... brilliant.' TIM BURGESS 'A container sized treasure trove bursting at the hinges with strangeness and wonder . . . I strongly advise you to buy it.' MAXINE PEAKE This is not a book about a rock band. This is not even a book about Mark E Smith. This is a book about The Fall group - or more precisely, their

world. Over a prolific forty-year career, the Fall created a world that was influential, idiosyncratic and fiercely original - and defied simple categorisation. Their frontman and lyricist Mark E. Smith spun opaque tales that resisted conventional understanding; the Fall's worldview was an education in its own right. Who wouldn't want to be armed with a working knowledge of M. R. James, shipping-dock procedures, contemporary dance, Manchester City and Can? The group inspired and shaped the lives of those who listened to and tried to make sense of their work. Bringing together previously unseen artwork, rare ephemera and handwritten material, alongside essays by a slate of fans, *EXCAVATE!* is a vivid, definitive record - an illumination of the dark corners of the Fall's wonderful and frightening world.

The Deep *Simon and Schuster*

"A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to forget--small things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. Then their bodies forget how to function involuntarily. There is no cure. But far below the surface of the Pacific Ocean, a universal healer hailed as 'ambrosia' has been discovered. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. When the station goes incommunicado, a brave few descend through the lightless fathoms in hopes of unraveling the mysteries lurking at those crushing depths...and perhaps to encounter an evil blacker than anything one could possibly imagine"--Page [4] of cover.

The Third Industrial Revolution *St. Martin's Press*

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Black Hole Survival Guide *Anchor*

From the acclaimed author of *Black Hole Blues* and *Other Songs from Outer Space*—an authoritative and accessible guide to the most alluring and challenging phenomena of contemporary science. "[Levin will] take you on a safe black hole trip, an exciting travel story enjoyed from your chair's event horizon." —*Boston Globe* Through her writing, astrophysicist Janna Levin has focused on making the science she studies not just comprehensible but also, and perhaps more important, intriguing to the nonscientist. In this book, she helps us to understand and find delight in the black hole—perhaps the most opaque theoretical construct ever imagined by physicists—illustrated with original artwork by American painter and photographer Lia Halloran. Levin takes us on an evocative exploration of black holes, provoking us to imagine the visceral experience of a black hole encounter. She reveals the influence of black holes as they populate the universe, sculpt galaxies, and even infuse the whole expanse of reality that we inhabit. Lively, engaging, and utterly unique, *Black Hole Survival Guide* is not just informative—it is, as well, a wonderful read from first to last.

Ethnolinguistic Prehistory *Brill's Tibetan Studies Librar*

"This volume provides the most up-to-date and holistic but compact account of the peopling of the world from the perspective of language, genes and material culture, presenting a view from the Himalayas. The phylogeny of language families, the chronology of branching of linguistic family trees and the historical and modern geographical distribution of language communities inform us about the spread of languages and linguistic phyla. The global distribution and the chronology of spread of Y chromosomal haplogroups appears closely correlated with the spread of language families. New findings on ancient DNA have greatly enhanced our understanding of the prehistory and provenance of our biological ancestors. The archaeological study of past material cultures provides yet a third independent window onto the complex prehistory of our species"--

The Stars My Destination *Orion Publishing Group*

One of the very best must-read SF novels of all time.

Event Horizon *John Hunt Publishing*

In an age where Silicon Valley dictates what it means to innovate a painless future, knowledge and enjoyment are fertile breeding grounds of political contestation. But it's not exactly democracy. We are controlled through platforms that turn us into data for the profit of billionaires. Control has become so playful that we carry it in our pockets, as we continue to crave likes and followers. What is to be done? Should the Left continue to cling to the promise of a political Event, patiently waiting for a revolutionary rupture where new possibilities emerge? Is there a way to delineate its horizons amidst the chaos? Through a psychoanalytic interrogation of the intersections of online culture, sexuality, and politics, Bonni Rambatan and Jacob Johanssen explore such horizons at the limits of capitalism. *Event Horizon* examines how capitalist ideology functions in our current moment, and, more importantly, how it breaks down. With the increasing urgency of formulating a proper Leftist response to the rapidly growing violence that seriously threatens the lives of marginalised communities, this book could not be more timely.
