Embedded C Programmer Jobs - October 2020 | Indeed United ...

Embedded Programming for the Internet of Things. Embedded programming is an essential part of how IoT devices work.

You'll probably need to learn C/C++ and get some hands-on electronics experience to master these crucial systems in production.

Embedded Programming for the Internet of Things

C is used for desktop computers, while embedded C is for microcontroller based applications. Accordingly, C has the luxury to use resources of a desktop PC like memory, OS, etc. While programming on desktop systems, we need not bother about memory. However, embedded C has to use with the limited resources (RAM, ROM, I/Os) on an embedded processor.
