### A Peoples History Of Science

'A Peoples History' argues that the history of science, like other histories, has two sides and that often the side most told and widely accepted is from the perspective of the ruling elite. Conner reminds us that the "Great Minds" we celebrate are often celebrated for ideas and inventions they did not come up with on their own.

A People's History of Science Miners, Midwives, and "Low Mechanics" By Clifford D. Conner Nation Books Buy the book. Praise for A People's History of Science "Cliff Conner's A People's History of Science is a delightfully refreshing new look at the history of science. I know of nothing like it, because it approaches that history free of the usual elitist preconceptions, and shows, in an inspiring way, the role that ordinary people, working people, played in the development of science.

Many historians credit ancient Greek philosopher Aristotle with inventing science. The history of science includes a number of other notable people who advanced it, most notably by introducing and refining the scientific method. Aristotle described nature and the way it worked unlike any before him. He was the first to use observations to describe the world around him, which is the foundation of empirical science.

The history of science has included several interesting periods where it was unclear whether a key concept would be redefined, replaced, or declared not to exist. For instance, more than a century ago Lavoisier convinced the scientific community that phlogiston did not exist and that the phenomena phlogiston was meant to explain were better accounted for by his new concept called “oxygen.”
