They are given powerful drugs like Ritalin in order to cope with their ADD, but many parents don't realize the dangerous side effects associated with these drugs, particularly the possibility of dependency. Addressing the causes of ADD and ADHD should be the first step in any treatment, but unfortunately, conventional drug therapies treat only the symptoms, not the causes. authors Rachel Bell and Dr. Howard Peiper take a uniquely nutritional approach to treating ADD and ADHD. The authors first address the root causes of the disorders, from poor nutrition and food allergies to environmental contaminants. They discuss which foods your child can eat and which foods he should avoid. To make changing your child's diet easier, the authors also offer you their very own healthy and delicious recipes. Final chapters examine the importance of detoxifying the body, supplementing diet with vitamins and nutrients, and exercising regularly in order to achieve good health. Living with ADHD

Simple Exercises to Change Your Daily Life *Simon and Schuster*

A practical system for those with ADHD to take back their personal power and embrace their unique talents for success in the modern world • Explains how those with ADHD grow up wounded by the negative labels and attitudes

surrounding them and their “diagnosis”

- Shares simple and fast-acting techniques from neurolinguistic programming (NLP) to recalibrate painful memories into valuable learning experiences, re-pattern learned behaviors and negative habits, and discover personal motivation
- Reveals how the novelty-seeking behaviors of those with ADHD are valuable assets to society and should be embraced rather than suppressed

One of the first rules of child-rearing is “condemn the behavior, not the child.” Yet this commonsense rule doesn’t seem to apply in the case of attention deficit disorder, or ADHD, where the very name of the condition implies that those labeled with it are “disordered,” “deficient,” and incapable of paying attention. Those with ADHD

grow up wounded, told by teachers, guidance counselors, even parents that they are dysfunctional and unable to succeed in the “normal” world. But, as ADHD expert Thom Hartmann explains, those with ADHD are capable of great success if they can shift the negative self-image created by others and learn to work with their unique strengths. In this accessible guide for adults with ADHD and the parents and teachers of ADHD children, Hartmann offers a practical system of useful tools and strategies to heal the damage done to a person who grew up labeled as “dysfunctional” and help them cope with--and succeed at--daily life. He explains how the character traits of ADHD were once valuable assets in hunter-gatherer societies and that the

later dominance of agricultural and industrial societies, where “farmer” and “worker” skillsets excel, left ADHD “hunters” as behavioral outcasts. Sharing simple and often fast-acting techniques from neurolinguistic programming (NLP), Hartmann explains how those with ADHD can take back their personal power, recalibrate painful memories into valuable learning experiences, shed fears and negative habits, and rebuild their self-image in a positive way. By integrating the strategies in this book into daily life, those with ADHD can transform their way of responding to the world, discover personal motivation, and teach their children to do the same. As Hartmann reveals, it is not ADHD that needs to be healed but our attitudes toward those

born with the “hunter” gift.

ADHD Does not Exist

The Truth About Attention Deficit and Hyperactivity Disorder *Harper Collins*

In this groundbreaking and controversial book, behavioral neurologist Dr. Richard Saul draws on five decades of experience treating thousands of patients labeled with Attention Deficit and Hyperactivity Disorder—one of the fastest growing and widely diagnosed conditions today—to argue that ADHD is actually a cluster of symptoms stemming from over 20 other conditions and disorders. According to recent data from

the Centers for Disease Control and Prevention, an estimated 6.4 million children between the ages of four and seventeen have been diagnosed with attention deficit hyperactivity disorder. While many skeptics believe that ADHD is a fabrication of drug companies and the medical establishment, the symptoms of attention-deficit and hyperactivity are all too real for millions of individuals who often cannot function without treatment. If ADHD does not exist, then what is causing these debilitating symptoms? Over the course of half a century, physician Richard Saul has worked with thousands of patients demonstrating symptoms of ADHD. Based on his experience, he offers a shocking conclusion: ADHD is not a condition on its own, but rather a

symptom complex caused by over twenty separate conditions—from poor eyesight and giftedness to bipolar disorder and depression—each requiring its own specific treatment. Drawing on in-depth scientific research and real-life stories from his numerous patients, *ADHD Does not Exist* synthesizes Dr. Saul's findings, and offers and clear advice for everyone seeking answers.

The Sacred Wound

Healing from the Death of a Child *Fireword Pub Incorporated*

This is an account of one of life's most painful experiences--the sudden death of a child. A mother's anguish compels her

to examine beliefs about what comes after death and to explore ancient healing methods in Mexico, Brazil, and Bali. At its core a spiritual odyssey, *The Sacred Wound* is about creating meaning from life-shattering events--events which can utterly destroy us or serve as a call to extraordinary courage and growth. A life-shattering event is a modern day "sacred wound," a wounding so profound that it pierces the soul and penetrates the veils of who we are and what we think life is about. Like a mythological hero, we will emerge from the ordeal another person. As the author says, "For three years grief was my consort, it became my teacher." This inspiring and searingly honest book is about more than survival following the death of a loved one; it is about the gift in tragedy's

other hand. It is about discovering the truth that love is the central experience of life and not simply mortality, and that this truth can emerge in ways we can never predict or expect
