Steel Structural Framing System | Technical Details | Metsec

Metsec's Steel Framing System (SFS) Division leads the market when it comes to light gauge galvanised steel structural framing designs and is suitable for a wider range of applications in most market sectors of construction.

SFS is a fast track cold rolled steel frame system which is site fixed as in-fill or continuous walling, high bay separating walls or load bearing structures.

Specification Manual - Sharp fibre

All Metsec lattice beams are supplied shot blasted and factory finished with a Zinc Phosphate primer as standard. Other painted finishes, including any standard RAL colour, are available upon request. This feature is particularly important if it is desired to leave the lattice members exposed as part of a 'feature' internal roof structure.

Steel Trusses - MLB Steel

Metsec eaves beams are designed as single span beams with combination loading in accordance with BS EN1990: 2002. The load tables Eaves Beams Load Table represent their performance under the conditions stated but cannot cover all of the many functions possible.
