Analytic philosophy has seen a resurgent interest in the possibility of explaining linguistic meaning in terms of truth, which many philosophers have seen as considerably more tractable than meaning. The core suggestion is that the meaning of a declarative sentence may be given by specifying certain conditions under which it is true.

Abstract. This book features a collection of essays by Donald Davidson that explore the relations between language and the world, speaker intention and linguistic meaning, language and mind, mind and body, mind and world, and mind and other minds. Truth - Wikipedia

In the philosophy of language, metaphysics, and metasemantics, meaning "is a relationship between two sorts of things: signs and the kinds of things they intend, express, or signify". The types of meanings vary according to the types of the thing that is being represented. Namely: There are the things in the world, which might have meaning; There are things in the world that are also signs of other things in the world, and so, are always meaningful; There are things that are necessarily meaningful

The formal structure that Tarski articulates in his 'semantic' account of truth is identical to that which Davidson explicates as the basis for a theory of meaning: a Tarskian truth theory can generate, for every sentence of the object-language, a T- sentence that specifies the meaning of each sentence in the sense of specifying the conditions under which it is true.

The Meaning of Language - Harvard University

Truth and Meaning is a classic collection of original essays on fundamental questions in the philosophy of language. It was first published in 1976, and has remained essential reading in this area ever since. The contributors include leading figures in late twentieth-century philosophy, such as Donald Davidson, Saul Kripke, P. F. Strawson, and Michael Dummett.

The relation between truth and meaning is not the only place where truth and language relate closely. Another is the idea, also much-stressed in the writings of Dummett (e.g., 1959), of the relation between truth and assertion. Again, it fits into a platitude: Truth is the aim of assertion.

Truth (Stanford Encyclopedia of Philosophy)

Truth, in metaphysics and the philosophy of language, the property of sentences, assertions, beliefs, thoughts, or propositions that are said, in ordinary discourse, to agree with the facts or to state what is the case. Truth is the aim of belief; falsity is a fault. People need the truth about the world in order to thrive.

1. The Paper. Philosophy of Language is organised around general questions of language and meaning. The nature of language has long been an obsession of philosophers, more recently it has also

become the focus of empirical investigation in linguistics. The subject is concerned both with the most general and abstract aspects of language, meaning and knowledge of both and with more specific problems that arise in understanding particular aspects of natural languages.

A formally adequate (that is, internally consistent) definition of truth for a language L is, in addition, materially adequate if it applies to all and only the true sentences of L; Tarski shows that an axiomatic theory θ meets this condition if it satisfies what he calls Convention T, which requires that θ entail for each sentence S of L an instance of schema T.

While the truth-conditional picture of meaning has dominated semantics, a serious challenge has been presented by philosophers, including Michael Dummett, who urge that the key to meaning is a notion of correct use. According to this alternative picture, the core of a sentence's meaning is the rule for its appropriate utterance.
