Computational Methods within Additive Manufacturing (AM) consist of: design systems; multifunctional additive manufacturing; lightweight components; developing software tools to make use a broad range of lattices in Selectively Laser Melting (SLM)

Computational Methods - The University of Nottingham

Additive manufacturing (AM) enables highly complex-shaped and functionally optimized parts. To leverage this potential the creation of part designs is necessary. However, as today's computer-aided design (CAD) tools are still based on low-level, geometric primitives, the modeling of complex geometries requires many repetitive, manual steps.
