In other words,
arithmetic is about the

counting of numbers and involves four basic operations: multiplication, division, subtraction and addition. This is the reason why arithmetic is essential to all maths – it is necessary to use arithmetic skills in topics covering systems of equations, polynomials, quadratic equations and inequalities.

Mathematical analysis is the branch of mathematics dealing with limits and related theories, such as differentiation, integration, measure,

infinite series, and analytic functions..

These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis.
