Undertile Heating Mats - Heat Mat

For the thermostat and heating system to work properly, installation must be correct. Before embedding in adhesive, position the sensor at least 150mm into the heated area, exactly between two runs of heating element. Keep the sensor tip away from drafts, sunlight, radiators, hot water pipes or other sources of heat fluctuations.

Underfloor Heating Mat Installation Manual

Always install the heating mat according to the installation manual. Electrical connection of the mat must be performed by a certified electrician. The minimum distance between the heating mat and other heat sources (e.g. hot water pipes) should always exceed 25 mm. The electric heating mat must be connected by a qualified electrician and requires a mains voltage of 230/240v

Floor heating can be installed in any room in the house and saves on space as the heating mats sit underneath the floor's surface. Another advantage is that it's suitable for a wide range of floor types,

giving you plenty of options to install in your home. The underfloor heating systems temperature can be easily controlled by a thermostat.

Underfloor Heating | Underfloor Heating Systems

Under tile DIY cable mat kits are ideal for installation under tiles or stone. This system is used when no sand and cement screed is being installed and the tiles are being directly 'stuck' to the floor surface. The mats have a self-adhesive backing, making them very quick and easy to install in large rooms and other open plan areas.

DIY Under-tile Floor Heating Mats | Sydney Floorheating

DEVI heating mats are placed just underneath the tiles, which makes for a very light floor construction. Thanks to DEVImat thickness, you can easily install it during a house renovation without destroying an old floor.
