Faces at the Bottom of the Well

The Permanence of Racism *Basic Books*

The classic work on American racism and the struggle for racial justice In Faces at the Bottom of the Well, civil rights activist and legal scholar Derrick Bell uses allegory and historical example to argue that racism is an integral and permanent part of American society. African American struggles for equality are doomed to fail so long as the majority of whites do not see their own well-being threatened by the status quo. Bell calls on African Americans to face up to this unhappy truth and abandon a misplaced faith in inevitable progress. Only then will blacks, and those whites who join with them, be in a position to create viable strategies to alleviate the burdens of racism. "Freed of the stifling rigidity of relying unthinkingly on the slogan 'we shall overcome,'" he writes, "we are impelled both to live each day more fully and to examine critically the actual effectiveness of traditional civil rights remedies." With a new foreword by Michelle Alexander, Faces at the Bottom of the Well is urgent and essential reading on the problem of racism in America.

And We Are Not Saved

The Elusive Quest For Racial Justice

A distinguished legal scholar and civil rights activist employs a series of dramatic fables and dialogues to probe the foundations of America's racial attitudes and raise disturbing questions about the nature of our society.

Afrolantica Legacies

Bell is still deeply interested in issues of race relations and has chosen to explore the subject fictionally in Afrolantica Legacies. In a nutshell, the story goes like this: a mysterious land mass suddenly appears in the Atlantic Ocean, a fabulous island on which only black people can survive. American blacks set sail to the island to begin a new life, only to see it sink again before they can reach the shore.

The Derrick Bell Reader *NYU Press*

Lawyer, activist, teacher, writer: for over 40 years, Derrick Bell has provoked his critics and challenged his readers with uncompromising candor and progressive views on race and class in America. A founder of Critical Race Theory and pioneer of the use of allegorical stories as tools of analysis, Bell's groundbreaking work shatters conventional legal orthodoxies and turns comfortable majoritarian myths inside out. Edited and with an extensive introduction by leading critical race theorists Richard Delgado and Jean Stefancic, The Derrick Bell Reader reflects the tremendous breadth of issues that Bell has grappled with over his phenomenal career, including affirmative action, black nationalism, legal education and ethics. Together, the selections offer the most complete collection of Derrick Bell's writing available today.

Silent Covenants

Brown v. Board of Education and the Unfulfilled Hopes for Racial Reform *Oxford University Press*

When the landmark Supreme Court case of Brown vs. Board of Education was handed down in 1954, many civil rights advocates believed that the decision, which declared public school segregation unconstitutional, would become the Holy Grail of racial justice. Fifty years later, despite its legal irrelevance and the racially separate and educationally ineffective state of public schooling for most black children, Brown is still viewed by many as the perfect precedent. Here, Derrick Bell shatters the shining image of this celebrated ruling. He notes that, despite the onerous burdens of segregation, many black schools functioned well and racial bigotry had not rendered blacks a damaged race. He maintains that, given what we now know about the pervasive nature of racism, the Court should have determined instead to rigorously enforce the "equal" component of the "separate but equal" standard. Racial policy, Bell maintains, is made through silent covenants--unspoken convergences of interest and involuntary sacrifices of rights--that ensure that policies conform to priorities set by policy-makers. Blacks and whites are the fortuitous winners or losers in these unspoken agreements. The experience with Brown, Bell urges, should teach us that meaningful progress in the quest for racial justice requires more than the assertion of harms. Strategies must recognize and utilize the interest-convergence factors that strongly influence racial policy decisions. In Silent Covenants, Bell condenses more than four decades of thought and action into a powerful and eye-opening book.

Face at the Bottom of the World and Other Poems *Tuttle Publishing*

Face at the Bottom of the World and Other Poems is a collection of Japanese poetry by master poet, Hagiwara Sakutaro. Hagiwara Sakutaro (1886-1942) is generally recognized in Japan as the best poet to have emerged since contact was re-established with the outside world. His work represents the astonishing achievement in the poetic field of General Meiji endeavor to blend "Western learning with the Japanese spirit." He and perhaps he alone, have successfully combined the lyric intensity characteristic of the short forms of traditional Japanese poetry with the freedom of length, form and rhythm which characterizes the poetry of the West. In him East and West, despite Kipling's dictum, have indeed met; and from him the future poets of both traditions have much to learn. For all the startling beauty and originality of his work, Hagiwara remains a poet of the dark. Shiveringly sensitive to loveliness in all its million modes, he finds it not only in its familiar haunts but even in such unexpected subjects as rotten calm or the dead body of an alcoholic. A man intensely aware that the sun, that symbol of Japan, rises as much to cast shadows as to give light.

The Heroine with 1001 Faces *Liveright Publishing*

World-renowned folklorist Maria Tatar reveals an astonishing but long buried history of heroines, taking us from Cassandra and Scheherazade to Nancy Drew and Wonder Woman. The Heroine with 1,001 Faces dismantles the cult of warrior heroes, revealing a secret history of heroism at the very heart of our collective cultural imagination. Maria Tatar, a leading authority on fairy tales and folklore, explores how heroines, rarely wielding a sword and often deprived of a pen, have flown beneath the radar even as they have been bent on redemptive missions. Deploying the domestic crafts and using words as weapons, they have found ways to survive assaults and rescue others from harm, all while repairing the fraying edges in the fabric of their social worlds. Like the tongueless Philomela, who spins the tale of her rape into a tapestry, or Arachne, who portrays the misdeeds of the gods, they have discovered instruments for securing fairness in the storytelling circles where so-called women's work—spinning, mending, and weaving—is carried out. Tatar challenges the canonical models of heroism in Joseph Campbell's The Hero with a Thousand Faces, with their male-centric emphases on achieving glory and immortality. Finding the women missing from his account and defining their own heroic trajectories is no easy task, for Campbell created the playbook for Hollywood directors. Audiences around the world have willingly surrendered to the lure of quest narratives and charismatic heroes. Whether in the form of Frodo, Luke Skywalker, or Harry Potter, Campbell's archetypical hero has dominated more than the box office. In a broad-ranging volume that moves with ease from the local to the global, Tatar demonstrates how our new heroines wear their curiosity as a badge of honor rather than a mark of shame, and how their "mischief making" evidences compassion and concern. From Bluebeard's wife to Nancy Drew, and from Jane Eyre to Janie Crawford, women have long crafted stories to broadcast offenses in the pursuit of social justice. Girls, too, have now precociously stepped up to the plate, with Hermione Granger, Katniss Everdeen, and Starr Carter as trickster figures enacting their own forms of extrajudicial justice. Their quests may not take the traditional form of a "hero's journey," but they reveal the value of courage, defiance, and, above all, care. "By turns dazzling and chilling" (Ruth Franklin), The Heroine with 1,001 Faces creates a luminous arc that takes us from ancient times to the present day. It casts an unusually wide net, expanding the canon and thinking capaciously in global terms, breaking down the boundaries of genre, and displaying a sovereign command of cultural context. This, then, is a historic volume that informs our present and its newfound investment in empathy and social justice like no other work of recent cultural history.

Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates’s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children’s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, Between the World and Me clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Seeing Race Again

Countering Colorblindness across the Disciplines *Univ of California Press*

Every academic discipline has an origin story complicit with white supremacy. Racial hierarchy and colonialism structured the very foundations of most disciplines’ research and teaching paradigms. In the early twentieth century, the academy faced rising opposition and correction, evident in the intervention of scholars including W. E. B. Du Bois, Zora Neale Hurston, Carter G. Woodson, and others. By the mid-twentieth century, education itself became a center in the struggle for social justice. Scholars mounted insurgent efforts to discredit some of the most odious intellectual defenses of white supremacy in academia, but the disciplines and their keepers remained unwilling to interrogate many of the racist foundations of their fields, instead embracing a framework of racial colorblindness as their default position. This book challenges scholars and students to see race again. Examining the racial histories and colorblindness in fields as diverse as social psychology, the law, musicology, literary studies, sociology, and gender studies, Seeing Race Again documents the profoundly contradictory role of the academy in constructing, naturalizing, and reproducing racial hierarchy. It shows how colorblindness compromises the capacity of disciplines to effectively respond to the wide set of contemporary political, economic, and social crises marking public life today.

Maid

Hard Work, Low Pay, and a Mother's Will to Survive *Legacy Lit*

NEW YORK TIMES BESTSELLER AND INSPIRATION FOR THE NETFLIX LIMITED SERIES, HAILED BY ROLLING STONE AS "A GREAT ONE." "A single mother's personal, unflinching look at America's class divide, a description of the tightrope many families walk just to get by, and a reminder of the dignity of all work." -PRESIDENT BARACK OBAMA, Obama's Summer Reading List At 28, Stephanie Land's dreams of attending a university and becoming a writer quickly dissolved when a summer fling turned into an unplanned pregnancy. Before long, she found herself a single mother, scraping by as a housekeeper to make ends meet. Maid is an emotionally raw, masterful account of Stephanie's years spent in service to upper middle class America as a "nameless ghost" who quietly shared in her clients' triumphs, tragedies, and deepest secrets. Driven to carve out a better life for her family, she cleaned by day and took online classes by night, writing relentlessly as she worked toward earning a college degree. She wrote of the true stories that weren't being told: of living on food stamps and WIC coupons, of government programs that barely provided housing, of aloof government employees who shamed her for receiving what little assistance she did. Above all else, she wrote about pursuing the myth of the American Dream from the poverty line, all the while slashing through deep-rooted stigmas of the working poor. Maid is Stephanie's story, but it's not hers alone. It is an inspiring testament to the courage, determination, and ultimate strength of the human spirit.

Race, Rights, and Redemption

The Derrick Bell Lectures on the Law and Critical Race Theory *The New Press*

Leading legal lights weigh in on key issues of race and the law—collected in honor of one of the originators of critical race theory “Penetrating essays on race and social stratification within policing and the law, in honor of pioneering scholar Derrick Bell.” —Kirkus Reviews (starred review) When Derrick Bell, one of the originators of critical race theory, turned sixty-five, his wife founded a lecture series with leading scholars, including critical race theorists, many of them Bell’s former students. Now these lectures, given over the course of twenty-five years, are collected for the first time in a volume Library Journal calls “potent” and Kirkus Reviews, in a starred review, says “powerfully acknowledge[s] the persistence of structural racism.” “To what extent does equal protection protect?” asks Ian Haney López in a penetrating analysis of the gaps that remain in our civil rights legal codes. Sherrilyn Ifill, president and director-counsel of the NAACP Legal Defense Fund, describes the hypersegregation of our cities and the limits of the law’s ability to change deep-seated attitudes about race. Patricia J. Williams explores the legacy of slavery in the law’s current constructions of sanity. Anita Allen discusses competing privacy and accountability interests in the lives of African American celebrities. Chuck Lawrence interrogates the judicial backlash against affirmative action. And Michelle Alexander describes what caused her to break ranks with the civil rights community and take up the cause of those our legal system has labeled unworthy. Race, Rights, and Redemption (which was originally published in hardcover under the title Carving Out a Humanity) gathers some of our country’s brightest progressive legal stars in a volume that illuminates facets of the law that have continued to perpetuate racial inequality and to confound our nation at the start of a new millennium. Mismatch

How Affirmative Action Hurts Students It's Intended to Help, and Why Universities Won't Admit It *Basic Books*

The debate over affirmative action has raged for over four decades, with little give on either side. Most agree that it began as noble effort to jump-start racial integration; many believe it devolved into a patently unfair system of quotas and concealment. Now, with the Supreme Court set to rule on a case that could sharply curtail the use of racial preferences in American universities, law professor Richard Sander and legal journalist Stuart Taylor offer a definitive account of what affirmative action has become, showing that while the objective is laudable, the effects have been anything but. Sander and Taylor have long admired affirmative action's original goals, but after many years of studying racial preferences, they have reached a controversial but undeniable conclusion: that preferences hurt underrepresented minorities far more than they help them. At the heart of affirmative action's failure is a simple phenomenon called mismatch. Using dramatic new data and numerous interviews with affected former students and university officials of color, the authors show how racial preferences often put students in competition with far better-prepared classmates, dooming many to fall so far behind that they can never catch up. Mismatch largely explains why, even though black applicants are more likely to enter college than whites with similar backgrounds, they are far less likely to finish; why there are so few black and Hispanic professionals with science and engineering degrees and doctorates; why black law graduates fail bar exams at four times the rate of whites; and why universities accept relatively

affluent minorities over working class and poor people of all races. Sander and Taylor believe it is possible to achieve the goal of racial equality in higher education, but they argue that alternative policies -- such as full public disclosure of all preferential admission policies, a focused commitment to improving socioeconomic diversity on campuses, outreach to minority communities, and a renewed focus on K-12 schooling -- will go farther in achieving that goal than preferences, while also allowing applicants to make informed decisions. Bold, controversial, and deeply researched, Mismatch calls for a renewed examination of this most divisive of social programs -- and for reforms that will help realize the ultimate goal of racial equality.

Spanning the whole of his career, this collection includes classic theoretical essays such as “The Whites of Their Eyes” (1981) and “Race, the Floating Signifier” (1997). It also features public lectures, political articles, and popular pieces that circulated in periodicals and newspapers, which demonstrate the breadth and depth of Hall's contribution to public discourses of race. Foregrounding how and why the analysis of race and difference should be concrete and not merely descriptive, this collection gives organizers and students of social theory ways to approach the interconnections of race with culture and consciousness, state and society, policing and freedom.

Communities in Action

Pathways to Health Equity *National Academies Press*
In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called

determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Speak: The Graphic Novel *Farrar, Straus and Giroux (BYR)*
The critically acclaimed, award-winning, modern classic Speak is now a stunning graphic novel. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's Speak: The Graphic Novel comes alive for new audiences and fans of the classic novel. This title has Common Core connections.
