Computer algebra systems began to appear in the 1960s and
evolved out of two quite different sources—the requirements of
theoretical physicists and research into artificial intelligence.. A
prime example for the first development was the pioneering work
conducted by the later Nobel Prize laureate in physics Martinus
Veltman, who designed a program for symbolic mathematics,

5 Types of Math Used in Computer Science - Computer ...

The reason we as students need to learn math alongside
Computer Science is that Computer Science is founded in math.
Computers are really just math machines at the lowest level. But
even if you're not working at the low-level when programming,
you're still likely to use algebra and PEMDAS (Parenthesis,
Exponents, Multiplication, Division, Addition, and Subtraction).
