IET Digital Library: IET Quantum Communication

The system designs for quantum communication are complex electrical-optical systems. A complex optical setup with (semi-) transparent mirrors is required to generate entangled photons. Various electronic components are also required to control the photon source that must frequently operate at extremely short time scales.

Electronics For Quantum Communications

The Bachelor of Quantum Engineering (Honours) will train students in advanced electronics and telecommunication engineering, specialising in how to design and control complex quantum systems. The degree will cover nanoelectronics, microwave engineering and quantum technologies for advanced sensors, secure communications and computing.
