Concepts of Biology

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For

these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Not Quite Adults

Why 20-Somethings Are Choosing a Slower Path to Adulthood, and Why It's Good for Everyone *Bantam*

Why are 20-somethings delaying adulthood? The media have flooded us with negative headlines about this generation, from their sense of entitlement to their immaturity. Drawing on almost a decade of cutting-edge research and nearly five hundred interviews with young people, Richard Settersten, Ph.D., and Barbara E. Ray shatter these stereotypes, revealing an unexpected truth: A slower path to adulthood is good for all of us. Their surprising findings include • Young adults who finish college and delay marriage and child-rearing get a much better start in life. • Few 20-somethings who live at home are mooching off their parents. More often, they are using the time at home to gain necessary credentials and save money for a more secure future. • Helicopter parents aren't so bad after all. Involved parents provide young people with advantages, including mentoring and economic support, that have become increasingly necessary to success. Not Quite Adults is a fascinating look at an often misunderstood generation. It's a must-read for parents, teachers, psychologists, sociologists, and anyone interested in today's youth culture.
