(PDF) Computer-aided design in Civil Engineering

The capabilities that engineers now possess due to CAD and CAE have resulted in most design verification being completed using computer simulations rather than through physical prototype testing. A worldwide CAD trends study conducted in 2016 found that usage in CAE is expected to grow to 43% over the next 3-5 years. The study also found that those in the manufacturing industries tend to use it most for design optimization, design validation and prediction of product performance.
