As Asian diets increasingly shift to resemble typical Western palates, the food supply chain will be challenged to keep pace with the demand. Michael Silverstein reveals the trends in motion and offers strategic ideas on how to address these obstacles.

Michael Silverstein: The future of food | TED Talk

0:06 Skip to 0 minutes and 6 seconds Hi, I'm Dr. Dan Bebber from the Department of Biosciences, University of Exeter. And I am Natalia Lawrence, Associate Professor in psychology. And we're the academic leads for this future food MOOC. Currently, agriculture uses about half the world's land surface to produce food, and that's a huge impact on global biodiversity and ecosystem services.

Sustainable Food Systems - Online Course - FutureLearn

Complex global rules on intellectual property -- e.g. patents, copyright and plant variety protection -- are laying the foundation for a more corporate future control of food and farming and undermining attempts to maintain biodiversity, ensure food security and meet the needs of developing countries, according to a new book published this month.

GRAIN | New book: The future control of food

This new initiative focuses on the resilience of food systems, including ecological, policy and human dimensions. “The study of food shows us just how interconnected biological systems and human societies are,” said Simon Levin, the James S. McDonnell Distinguished University Professor in Ecology and Evolutionary Biology. “Understanding what makes food and agricultural systems resilient will be critical for adapting to growing demand and increased environmental pressures,” he said.

The future of food in a changing climate
