Trinidad and Tobago. Hi Andre/Fellow Tuners, My buddy owns a 1993 Suzuki Swift GTi, the ones that came with the G13B engine. Basically a 1300cc DOHC EFI 16 valve engine running a distributor. He is in the process of fitting an AEM EMS4 to the car to run the engine in place of the factory ECU but he's making some radical changes to the engine that I'd like some insight into problems/considerations he should be aware of.

Custom Triggering Suzuki Swift GTi - hpacademy.com

I've got a GTI(g13b) in my SJ, and also one older g13a GTI in the garage that formerly was under the hood of the SJ. But I don't think those are much different if you're towing something, because the GTI is a high revving engine that puts out the most HP at 6000rpm's or so, and torque is the thing you need when towing something and it's not pushing out much more of it than the jimny engine is.
