Final Exception - 1x1px.me

The blank final, which was introduced in
Java 1.1, is a final variable whose
declaration lacks an initializer. Previous
to Java 1.1, a final variable was required
to have an initializer. A blank final, by
definition of "final", can only be assigned
once. i.e. it must be unassigned when an
assignment occurs.

final (Java) - Wikipedia

Final class can't be inherited, final
method can't be overridden and final
variable value can't be changed. Finally
is used to place important code, it will be
executed whether exception is handled
or not. Finalize is used to perform clean
up processing just before object is
garbage collected. 2) Final is a keyword.
Finally is a block.

Difference between final, finally and finalize - javatpoint

Java try, catch and finally blocks helps in
writing the application code which may
throw exceptions in runtime and gives us
a chance to either recover from
exception by executing alternate
application logic or handle the exception
gracefully to report back to the user. It
helps in preventing the ugly application
crashes. 1.

Java try catch finally blocks - HowToDoInJava

Java finally block is a block that is used
to execute important code such as
closing connection, stream etc. Java
finally block is always executed whether
exception is handled or not. Java finally
block follows try or catch block. Note: If
you don't handle exception, before
terminating the program, JVM executes
finally block (if any).

Java Finally block - javatpoint

And the second line that is written after the exception occur is not printed because at the point where the Exception occurred the execution will stop and the statements after the exception will not be executed. So the "finally" block execution stops at the point where the exception is thrown. Step 5: Now the third point.
