It is a user-friendly and well-manipulated software which uses a semantic net of information representation by applying a hierarchy of various object components and/or structures.

The development of the software for the controller of an ...

The next development for automatic watches came in 1948 from Eterna Watch. To wind a watch effectively, one of the chief requirements of a rotor is heft. Until this point, the best bearing used in any watch was a jewel bearing, which perfectly suits the small gears of a watch. A rotor, on the other hand, requires a different solution.
