In a ventilation dehumidifier equipped with a heat pump, the heat pump functions both as a dehumidifier and a dedicated heat pump. This solution provides better heat recovery and minimises the necessary outdoor air intake. The heat pump will warm up the air and can also dehumidify the air during the night, if there is a need for this.

How to choose the right dehumidifier for indoor pools ...

A dehumidifier is an electrical appliance which reduces and maintains the level of humidity in the air, usually for health or comfort reasons, or to eliminate musty odor and to prevent the growth of mildew by extracting water from the air. It can be used for household, commercial, or industrial applications. Large dehumidifiers are used in commercial buildings such as indoor ice rinks and swimming pools, as well as manufacturing plants or storage warehouses.
