Chinese Architecture 101, Your Guide To Understand

Dougong is a unique structural element of interlocking wooden brackets, one of the most important elements in traditional Chinese architecture. The use of dougong first appeared in buildings of the late centuries BC and evolved into a structural network that joined pillars and columns to the frame of the roof. Dougong was widely used in the ancient Chinese during the Spring and Autumn period and developed into a complex set of interlocking parts by its peak in the Tang and Song periods. The piec

Dougong - Wikipedia

Ancient Chinese architecture is mainly timberwork. Wooden posts, beams, lintels and joists make up the framework of a house. Walls serve as the separation of rooms without bearing the weight of the whole house, which is unique to China. As a famous saying goes, 'Chinese houses will still stand when their walls collapse.'
