(PDF) Health Information Retrieval - ResearchGate

Information retrieval is the science of searching for information in a document, searching for documents themselves, and also searching for the metadata that describes data, and for databases of texts, images or sounds. Automated information retrieval systems are used to reduce what has been called information overload. An IR system is a software system that provides access to books, journals and other documents; stores and manages those documents.

Information Retrieval: A Health and Biomedical Perspective ...

The work of the information retrieval (IR) group involves developing effective web-based technologies that support people with accessing, managing and using information. We approach this from different perspectives, including the study of the interactions between people, information and technologies; and the development of computational methods that support information access and use.
