Passive solar building design - Wikipedia

Climate control systems (solar heating/cooling systems) may be classified as either active or passive in nature. Passive systems use no purchased energy resources; normally are assembled of "architectural" building elements doing double duty, such as glazings, walls, floors, and finishes; and require design coordination.

Passive Solar Heating and Cooling Systems

Passive cooling is free, unlike air conditioning which is expensive to install and run. Passive cooling should be part of an overall approach to passive design. Depending on your situation (climate, house style, personal preferences, etc) it is most effective if you incorporate the principles of both passive cooling and passive heating.
