MerCruiser Complete Inboard Gas Engines - eBay

The typical Mercruiser engine is an inline 4-cylinder, V6 or V8 engine produced by General Motors
 and based on existing automotive engine designs. However, during the 1980s, Mercruiser designed
 and built an engine that was not a pre-existing automotive engine. This engine displaces 3.7 liters
 and uses the head, connecting rods, pistons and flywheel from the Ford 460 engine.

Mercruiser 3.7 Specifications | It Still Runs

It was a 3.7-liter inline four-cylinder engine that produced 170 horsepower, a powerful alternative to
 the 160- and 165-horsepower six-cylinder Mercury engines. The 470 featured a cast aluminum
 engine block designed by Mercury Marine, the name Kiekhaefer's company had taken in 1969, and
 the block was mated with an iron cylinder head from the Ford 460 V-8 engine.

Mercruiser 470 Engine Facts | It Still Runs

I typed in Mercruiser 485 and it came up as a Big 4" 485/470 lots of info about the motor, not the
 best motor Mercruiser ever used but a buddy of mine has one in his boat and he likes it. Easy on fuel
 and a great trolling motor he can get under 1mph with it. I guess it's half of a 460 ford engine with a
 428cid head.

Mercruiser 485/185HP Questions - This Old Boat - Lake ...

I'm looking at a 1986 Sea Ray Sundancer 270 w/ twin Mercruiser 170s. I think these are the 4-
 cylinder Mercruiser exclusive engine. What I've read so far is that it's a Mercruiser block, with a Ford
 head. I've heard good and bad things about these engines and am slightly reserved about these
 being enough power for this boat.

Our '96 engine might not be "older" but its 1200+ hours just might. Mechanic suggested 40W dino oil. I used it a couple seasons and decided to try Castrol 20W-50 GTX. Holds pressure and doesn't use between changes. The 40W held pressure but the engine used some. This info seems to confirm it's better to run the boat than look at it. God Bless, jd
