Quantitative data offer an indirect assessment of the usability of a design.

They can be based on users' performance on a given task (e.g., task-completion times, success rates, number of errors) or can reflect participants' perception of usability (e.g., satisfaction ratings). Quantitative metrics are simply numbers, and as such, they can be hard to interpret in the absence of a reference point.

### **QUALITATIVE AND QUANTITATIVE EVALUATION**

The limitations of using quantitative data for evaluation can include poor response rates from surveys, difficulty obtaining documents, and difficulties in valid measurement. In addition, quantitative data do not provide an understanding of the program's context and may not be robust enough to explain complex issues or interactions (Holland et al., 2005; Garbarino et al., 2009).
