Principles of Evidence in International Criminal Justice Oxford University Press, USA

Principles of Evidence in International Criminal Justice provides an overview of the procedure and practice concerning the admission and evaluation of evidence before the international criminal tribunals. The book is both descriptive and critical and its emphasis is on day-to-day practice, drawing on the experience of the Yugoslavia, Rwanda and Sierra Leone Tribunals. This book is an attempt to define and explain the core principles and rules that have developed at those ad hoc Tribunals; the rationale and origin of those rules; and to assess the suitability of those rules in the particular context of the International Criminal Court which is still at its early stages. The ICC differs in structure from the ad hoc Tribunals and approaches the legal issues it has to resolve differently from its predecessors. The ICC is however confronted with many of the same questions. The book examines the differences between the ad hoc Tribunals and the ICC and seeks to offer insights as to how and in which circumstances the principles established over years of practice at the ICTY, ICTR and SCSL may serve as guidance to the ICC practitioners of today and the future. The contributors

represent a cross-section of the practicing international criminal bar, drawn from the ranks of the Bench, the Prosecution and the Defence and bringing with them different legal domestic cultures. Their mixed background underlines the recurring theme in this book which is the manner in which a legal culture has gradually taken shape in the international Tribunals, drawing on the various traditions and experiences of its participants.

Principles of Chinese Criminal Procedure *Bloomsbury Publishing*

This book presents a short history and timeline of criminal procedure legislation in China. First, it addresses the status of Human Rights Conventions and the challenges resulting from human rights standards for Chinese criminal procedural law and practice. The discussion then moves on to explore the fundaments of Chinese criminal procedure such as the applicable law found in the Chinese CPL (Criminal Procedure Law) and legal institutions. The book covers relevant actors in the Chinese Criminal Justice System (ie judges, prosecutors, police, defence councils) as well as the relationships between them. The Impact of Scientific Evidence on the Criminal Trial

The Case of DNA Evidence *Routledge*

This book explores challenges posed by the use of DNA evidence to the traditional features, procedures and principles of the criminal trial. It examines the limitations of existing theories of criminal trial processes in the face of increasing use of scientific evidence in the court room. The research elucidates the interconnections at trial of three epistemologies, namely legal reasoning, as represented by counsel and trial judge, common sense manifested by the jury and scientific reasoning expounded by the expert witness. Sallavaci argues that while scientific reasoning is part of this hybrid of trial languages and practices, its extended use is producing specifically novel tensions which impact on the traditional criminal trial landscape. Through the lens of DNA evidence, the book investigates how far the use of scientific evidence in the fact finding process poses challenges for the adversarial character of the proceedings and rules of evidence; how it affects the role of the judge, jury and expert witness, as well as the principle of orality and continuity of the trial. In comparing the challenges faced in English common law trials to those of the USA, this book has international scope, and will be of great use and interest to students and researchers of Criminal Law and Practice, Policing, and the role of Forensics in Law.

Evidence in Criminal Trials *Bloomsbury Professional*

The law of evidence comprises the rules which govern the presentation of facts and proof in proceedings before a court. It is a subject of enormous importance to both practitioners and students. The principal objective of Evidence in Criminal Trials, 2nd edn, is to update the analysis of

Irish law and policy on criminal evidence. Given its nature, the law of evidence is constantly evolving and, in particular, is actively developed by the courts and occasionally the legislature. In the five years since the first edition was published, judicial decisions have been handed down in each of areas covered in the book. This is particularly true of the broad field of Testimony (chapters 2 to 6) and the area of Pre-Trial Interviews with Suspects (chapter 9). Aside from updating the text in this general sense, the second edition will examine a number of landmark developments that have occurred over the past four years. In DPP v JC (2015) IESC 31, the Supreme Court delivered a groundbreaking decision effectively re-writing the law on unlawfully obtained evidence by relaxing the strict exclusionary rule that had been applied by the courts for the previous fifty years. The revised exclusionary rule has been applied in a number of recent cases. In 2017, the Oireachtas substantially amended the legislative regime of special measures for vulnerable witnesses. The Criminal Justice (Victims of Crime) Act 2017, which transposed the EU Victims' Rights Directive, has extended these measures in principle to crime victims who are at risk of secondary victimisation. It has also enhanced the range of existing measures for children and persons with certain intellectual disabilities who give evidence in trials for violent and/or sexual offences. The combined effect is a substantial amendment of Part 3 of the Criminal Evidence Act 1992. Both the Victims of Crime Act and the Criminal Law (Sexual Offences) Act 2017 have introduced important changes relating to the evidence of complainants in trials for sexual offences. This area of trial practice has been the subject of controversy and various proposals for policy reform have been put forward. In 2016, the Law Reform Commission published its long-awaited Report on Consolidation and Reform of Aspects of the Law of Evidence. The very length report includes recommendations in the areas of expert evidence and the law on hearsay (two significant chapters within the book). It also examines the law relating to documentary evidence and makes proposals for the consolidation of evidence legislation. The second edition will contain a new chapter on the subject of European Criminal Evidence. The central focus is on the Mutual Legal Assistance Act 2008 which provides the framework for the taking of evidence located abroad. It also analyses various measures adopted under the auspices of the EU including the EU Directives on the Right of Access to a Lawyer, and on European Investigation Orders (which Ireland has not opted into). The current European Commission proposal for an instrument on European Preservation and Production Orders in relation to electronic evidence is also discussed. Includes references to the relevant case law of the European Court of Human Rights throughout the book. In addition, new material is added to existing chapters. For example, the discussion of the burdens and standards of proof will be extended (chapter 1) and the analysis of privilege (chapter 12). Similarly, the law on the admissibility of mixed statements will be included in the account of pre-trial interviews with suspects (chapter 9). The analysis of DNA evidence will be revised (chapter 10) by condensing some of the older material on point and including a review of the recent Supreme Court decision in DPP v Wilson (2017) IESC 54.

Scientific Evidence in Civil and Criminal Cases

This popular casebook is designed to provide those participating in trials with a concise understanding of the scope of the most commonly encountered types of expert testimony, and the nature of the results which may be expected from specialists. It explores both the potentialities and limitations of various types of expert proof. It considers qualifications needed for expertise in these various professional disciplines and discusses the status of the law concerning the various types of evidence encountered. The book first deals with the general concepts underlying expert opinion testimony, with the use of real and demonstrative evidence, and with opinion testimony of non-expert skilled witnesses. It then turns in succession to expert testimony based upon the physical sciences, and expert witnesses in the biological and life sciences. Finally, the book explores expert testimony in the behavioral sciences.
